

Amendments to the Claims

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims

1. (Currently Amended) An electronic communications device, comprising:

a processor; and

a storage medium comprising program instructions executable by the processor for:

receiving an electronic notification of a change to adapted to update a directory entry
stored within the electronic communications device, wherein the upon receipt of
an electronic notification that is associated with an identifier, a category heading,
and an altered value;

presenting the electronic notification to a user of the electronic communications device;
and

automatically updating the directory entry to include the altered value upon receipt of an
acceptance command generated by the user.

2. (Canceled)

3. (Previously Presented) The electronic communications device as recited in claim 1, wherein said altered value comprises a name, a telephone number, a mailing address or an email address.

4. (Original) The electronic communications device as recited in claim 1, wherein said electronic communications device comprises a telephone.

5. (Original) The electronic communications device as recited in claim 1, wherein said electronic communications device comprises a facsimile machine.

6. (Original) The electronic communications device as recited in claim 1, wherein said electronic communications device comprises a personal digital assistant.

7. (Currently Amended) The electronic communications device as recited in claim 1, wherein the ~~electronic communications device comprises:~~

~~a processor; and~~

~~a storage medium comprising further a data structure, wherein said data structure comprises fields adapted for storage of entry content values and an entry identifier associated with each directory entry, and wherein a the category heading is associated with the electronic notification and corresponds to one or more headings of said fields.~~

8. (Original) The electronic communications device as recited in claim 7, wherein said entry content values comprise a name, a telephone number, a mailing address or an email address.

9. (Canceled)

10. (Currently Amended) The electronic communications device as recited in claim 9~~1~~, wherein the ~~directory management program storage medium~~ further comprises program instructions executable by the processor for presenting a permission prompt to the user of the electronic communications device.

11. (Original) The electronic communications device as recited in claim 10, wherein said presenting comprises displaying on an output mechanism of the electronic communications device.

12. (Original) The electronic communications device as recited in claim 10, wherein said presenting comprises providing audible output.

13. (Currently Amended) The electronic communications device as recited in claim 10, wherein the ~~directory management program storage medium~~ further comprises program instructions executable by the processor for receiving a confirmation indicator to accept the received electronic notification.

14. (Currently Amended) The electronic communications device as recited in claim 10, wherein the ~~directory management program storage medium~~ further comprises program instructions executable by the processor for receiving a reject command to reject the received electronic notification.

15. (Original) The electronic communications device as recited in claim 14, wherein said receiving comprises receiving a vocal input.

16. (Previously Presented) The electronic communications device as recited in claim 14, wherein said receiving comprises receiving a dual tone multi-frequency (DTMF) tone.

17. (Currently Amended) The electronic communications device as recited in claim ~~13~~ 17, wherein the ~~directory management program storage medium~~ further comprises program instructions executable by the processor for comparing the entry identifier corresponding to the directory entry with the identifier of the electronic notification.

18. (Currently Amended) The electronic communications device as recited in claim 17, wherein the ~~directory management program storage medium~~ further comprises program instructions executable by the processor for comparing the headings of said fields corresponding to the data structure of the directory with the category heading of the electronic notification upon matching the entry identifier of the directory entry with the identifier of the electronic notification.

19. (Currently Amended) The electronic communications device as recited in claim 18, wherein the ~~directory management program storage medium~~ further comprises program instructions executable by the processor for replacing one or more entry content values corresponding to the directory entry with the altered value upon matching one or more headings of the fields with the category heading of the electronic notification.

20. (Canceled)

21. (Original) A method for allowing an update of a directory entry within an electronic communications device upon receipt of an electronic notification, said method comprising:

receiving said electronic notification indicating that at least a portion of the directory entry has changed to an altered value;

searching entirety of directory entries to match an identifier of the electronic notification with a matching entry identifier associated with the directory entry;

matching a field heading associated with the data structure of the directory entry with a category heading of said electronic notification; and

updating one or more entry content values with the altered value, wherein said entry content values correspond to a field associated with the matching entry identifier and field heading of the directory entry.

22. (Original) A storage medium comprising program instructions executable using a processor within an electronic communications device for:

receiving said electronic notification indicating that at least a portion of the directory entry has changed to an altered value;

searching entirety of directory entries to match an identifier of the electronic notification with a matching entry identifier associated with the directory entry; and

matching a field heading associated with the data structure of the directory entry with a category heading of said electronic notification; and

updating one or more entry content values with the altered value, wherein said entry content values correspond to a field associated with the matching entry identifier and field heading of the directory entry.
